

## Teleconference - July 11, 2006

### Why DB2 for z/OS data sharing should be in your life...

- *Why are customers doing data sharing?*
- *How much overhead can you expect from data sharing?*
- *How long does it take to implement data sharing?*
- *Do my applications have to change when I implement data sharing?*
- *Does data sharing allow for parallelism?*

#### DB2® for z - Data Sharing

Attend "Why DB2 for z/OS® data sharing should be in your life..." is a teleconference packed with important information for anyone considering the implementation of data sharing in their DB2 for z/OS environment.

#### Teleconference

IBM® has found that customers move to data sharing for one or more of the following reasons...the first being capacity – they have simply outgrown a single system. The second is that they need higher availability...simply put, protection against planned and unplanned outages. The third reason is easier growth accommodation...the requirement of scalable, non-disruptive growth. The fourth reason is dynamic workload balancing...handling unpredictable workload spikes...effectively utilizing available MIPs for mixed workloads. The fifth being...system consolidation for easier systems management. The sixth reason being...application investment

protection....applications do not need to become "cluster aware" as nodes are added. Join us and learn how data sharing can help.

#### Speaker:

Mark Rader – Consulting IT Specialist – IBM Corporation

**Available:** Tuesday July 11, 2006

First Call:

9:30 AM Eastern Daylight Time

2:30 PM British Summer Time

3:30 PM Central Europe Time

Second Call:

9:30 AM Pacific Daylight Time

12:30 PM Eastern Daylight Time

5:30 PM British Summer Time

6:30 PM Central Europe Time

**Audience:** System DBAs, Technical Managers and anyone interested in implementing data sharing for DB2 for z/OS.

#### Register online right now

We hope you can join us for this valuable teleconference. To register, please log on to [ibm.com/software/zseries/telecon/11jul](http://ibm.com/software/zseries/telecon/11jul)

For questions regarding this event please contact Dianne McCallum at 248-552-4356 or [dmccallu@us.ibm.com](mailto:dmccallu@us.ibm.com).
