

## Teleconference - July 25, 2006

### Data Sharing Health Checks....What We Have Learned

- *How many directory entries do I really need for my Group Buffer Pools...how do I handle GBP growth as my data sharing group adds new members...and what changes should I make to GBPs as each member's local buffer pools change?*
- *How much work can I process in this DB2®...how many threads can I have?*
- *My data sharing group has two Internal Coupling Facilities (ICFs)...is this a problem?*
- *How can I identify runaway jobs before they disrupt my environment.....what can I do about them?*

#### DB2 for z - Data Sharing

Attend "Data Sharing Health Checks..What We Have Learned" teleconference, packed with important information for anyone who has implemented data sharing in their DB2 for z/OS® environment and want to learn more.

#### Teleconference

The term "health check" is often used generically. This particular health check focuses on improving the robustness of the DB2 data sharing infrastructure of your company. Due to the division of responsibilities between DB2 and z/OS staff, it is often neglected and can become the weakest link in your on demand infrastructure. Over the last four years our speaker, who is from the Dallas System Center, has performed health checks on many large parallel sysplex systems in the Americas, where data sharing has been implemented. This teleconference will describe the obstacles observed and provide recommendations for achieving high availability targets. This presentation is applicable to DB2 V7 and V8.

#### Major Topics:

1. Keeping up with structure sizing
2. Easy, autonomic tuning of GBPs
3. What's wrong with ICF only configuration?
4. DBM1 Virtual Storage-how much do you have for real work?
5. Some usual suspects - runaways, rollbacks, ZPARMs.

**Speaker:** Judy Ruby-Brown – Sr. Consulting IT Specialist, DB2 for z/OS, Advanced Technical Support (ATS), IBM® Corporation

**Available:** Tuesday July 25, 2006

#### First Call:

9:30 AM Eastern Daylight Time  
2:30 PM British Summer Time  
3:30 PM Central Europe Time

#### Second Call:

9:30 AM Pacific Daylight Time  
12:30 PM Eastern Daylight Time  
5:30 PM British Summer Time  
6:30 PM Central Europe Time

**Audience:** System DBAs, Technical Managers and anyone who has implemented data sharing for DB2 for z/OS.

#### Register online right now

We hope you can join us for this valuable teleconference. To register, please log on to [ibm.com/software/zseries/telecon/25jul](http://ibm.com/software/zseries/telecon/25jul)
