

## Teleconference - September 7, 2006

### Data Warehousing on z..is it right for you?

- *Are your data warehousing requirements becoming more operational in terms of quality of service and availability? If they are...how are you addressing them?*
- *Do you need to backup and restore core warehouse data while providing data/system availability?*
- *Do you have large volumes of data to process and transform?*
- *Do you have expense and logistic issues when it comes to maintaining your data warehouse?*
- *Is security and data compliance an issue for your data warehouse?*

**DB2® for z/OS®, WebSphere® DataStage®, WebSphere II Replication, DB2 Alphablox, Rational® Data Architect, Tivoli® OMEGAMON® XE for DB2 Performance Expert, System z9® IIP.**

Attend "Data Warehousing on z...is it right for you", a teleconference which is packed with important information for Directors of IT, Directors of Data Warehousing, Database Managers and Administrators and anyone interested in creating and maintaining a data warehouse on z.

#### Teleconference

Data warehousing on z has been prompted by advancements in mainframe hardware and software technologies. In the area of hardware, new zIIP specialty engines free up capacity and optimize the z IT infrastructure. DB2, at the center of the warehouse, has been enhanced to support data warehousing...

with new functions like enhanced index options, new partitioning options as well as SQL enhancements to mention but a few. Additional software technologies from IBM can offer high-volume, complex data transformation and data movement used for standalone ETL or as a real-time data transformation engine. Join us as we discuss these and more topics related to data warehousing on z.

**Speaker:** Jaime Anaya, DB2 for zSeries Development

**Available:** Thursday, September 7, 2006

First Call:

9:30 AM Eastern Daylight Time

2:30 PM British Summer Time

3:30 PM Central Europe Time

Second Call:

9:30 AM Pacific Daylight Time

12:30 PM Eastern Daylight Time

5:30 PM British Summer Time

6:30 PM Central Europe Time

**Audience:** Directors of IT, Directors of Data Warehousing, Database Managers and Administrators and those interested in Data Warehouses.
